# How to print

Computer

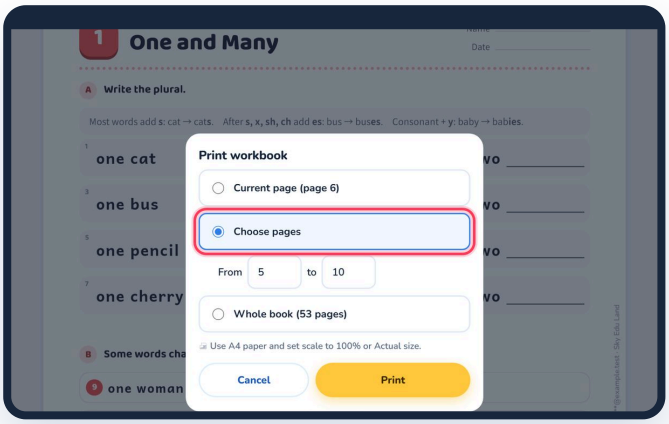

Print as many times as you like. If your child makes mistakes, just print the page again.

Red circle = where to click

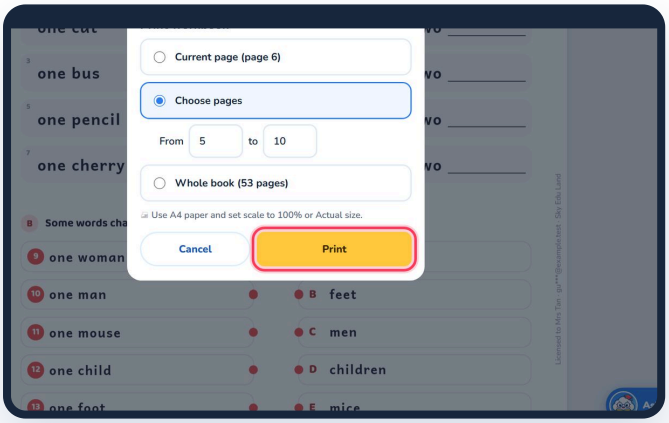

1 Open the workbook and click "Print" at the top right.

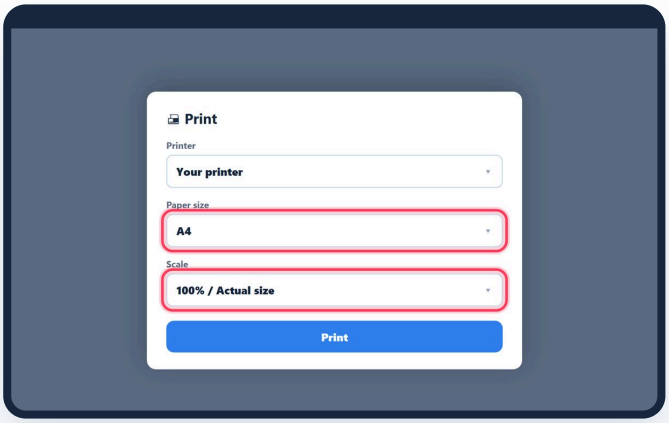

2 Choose the pages: **Current page**, **Choose pages** (e.g. 5 to 10) or **Whole book**.

3 Click **"Print"**, wait for the pages to get ready, then pick your printer.

4 In the printer settings choose **A4** paper and scale **100%** or **Actual size**, then print.

Printing from a computer is easiest, and you can print the whole book at once. Workbooks can't be downloaded as PDF, but you can come back and print any time.
