How to use Teacher Sky

Computer

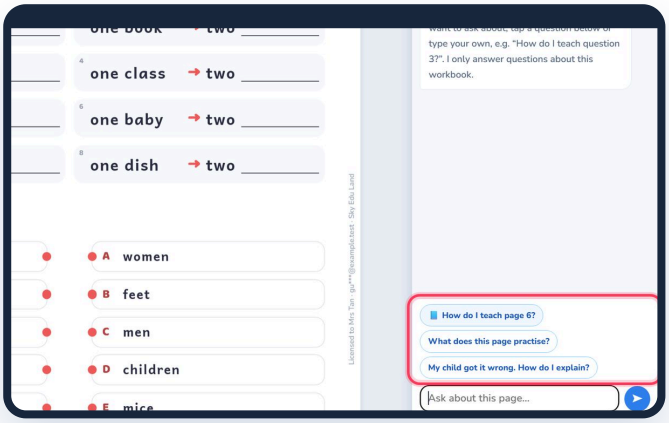

Teacher Sky is an AI helper: it doesn't just give answers, it shows parents how to guide the child step by step.

Red circle = where to click

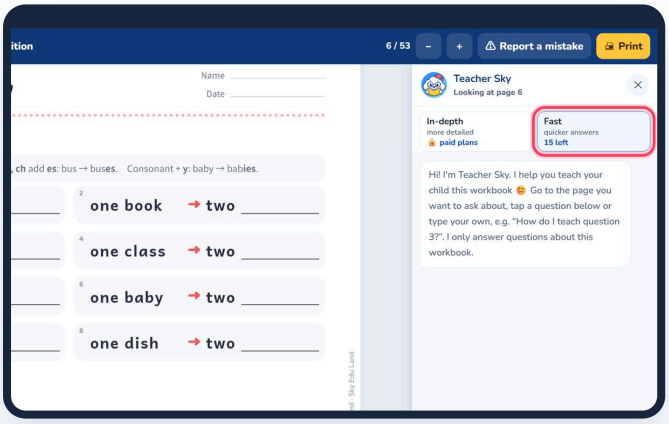

1 Open the workbook at the page your child is stuck on and click **“Ask Teacher Sky”**.

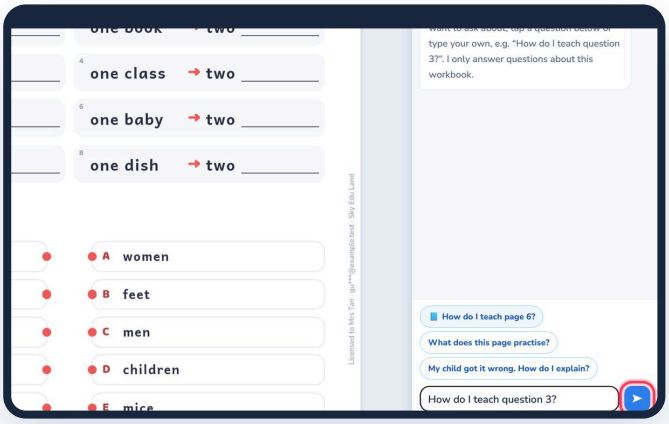

2 Click a ready question, e.g. **“How do I teach page 6?”**.

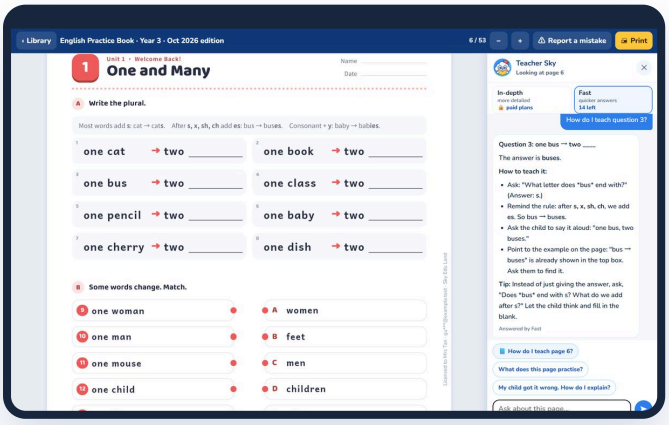

3 Pick **fast** (quicker) or **in-depth** (more detail, on a plan).

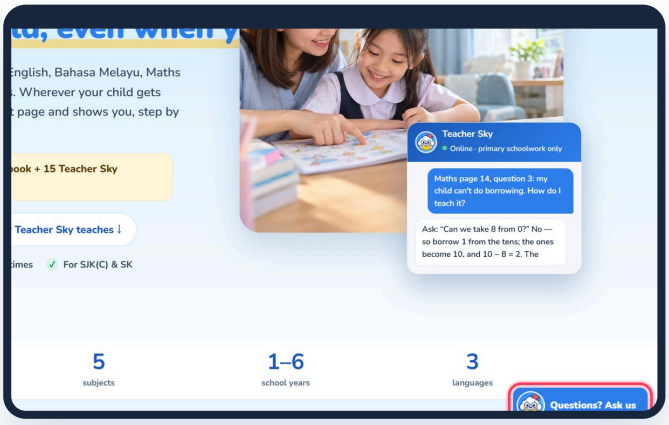

4 Or type your own, e.g. “How do I teach question 3?”, and click ➤.

5 Teacher Sky shows you, step by step, how to guide your child to the answer.

6 **Family plan and up**: ask about school homework too. Click **“Questions? Ask us”** at the bottom right.

7 Choose the **Teacher Sky** tab, click 📷 to add photos of the homework (up to 3) and say which question is hard.

💡 Free members get 15 questions a month. Teacher Sky only answers primary school questions. It is AI, so its answers are a guide.
